## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-56, drawn to compounds and compositions, classified in class 552, subclass 653.
  - II. Claims 57-75, drawn to method of treating a metabolic bone disease, classified in class 552, subclass 167.
  - III. Claims 76-85, drawn to a method of treating psoriasis, classified in class 514, subclass 167.
  - IV. Claims 86-102, drawn to a method of treating a cancerous disease, classified in class 514, subclass 167.
  - V. Claims 103-108, drawn to a method of treating a disease characterized by an imbalance in the immune system, classified in class 514, subclass 167.
  - VI. Claim 109, drawn to a method of treating rheumatoid arthritis, classified in class 514, subclass 167.
  - VII. Claims 110-111, drawn to a method of treating alopecia, classified in class 514, subclass 167.
  - VIII. Claim 112, drawn to a method of treating skin conditions, classified in class 514, subclass 167.
  - IX. Claim 113, drawn to a method of treating hypertension, classified in class 514, subclass 167.

Art Unit: 1616

- X. Claim 114, drawn to a method of treating hypocalcemia, classified in class 514, subclass 167.
- XI. Claim 115, drawn to a method of treating hypoparathyroidism, classified in class 514, subclass 167.
- XII. Claim 116, drawn to a method of treating inflammatory bowel disease, classified in class 514, subclass 167.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-XII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product and/or the product as claimed can be used in a materially different process of using that product (see Invention II-XII).

3. Inventions II-XII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together

Art Unit: 1616

and they have different effects (i.e., they are drawn to different methods of using the products that are not interrelated).

4. Because these inventions are distinct for the reasons given above and the search required for one Group I is not required for the other Groups, restriction for examination purposes as indicated is proper.

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, from within the elected Group, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1616

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Telephone Inquiry***

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Barbara P Badio, Ph.D. whose telephone number is 703-308-4595. The examiner can normally be reached on M-F from 7:30am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jose Dees can be reached on 703-308-4628. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4556 for regular communications and 703-308-4556 for After Final communications.
